

**IN THE SPECIFICATION:**

**Please amend the paragraph beginning on Page 5, line 4 to read as follows:**

--The user 103 makes hand and finger movements as if he or she were typing on a keyboard 107. The user can imagine the keyboard. The user can approximately moves his or her hands, trying to imagine how he or she would move the fingers if there were a real keyboard. As figure 1 clearly shows, these gestures are made without touching any touch sensors.--
